

Assessment of Student Learning Report Form

Contact Person(s): Cynthia Hussain ED.D.		Date of Report Submission: 10/11/2018
Academic Division: Liberal Arts	Semester Assessment Conducted: Spring 2015	
Discipline/Program/Department: Reading		Identify if assessment is: Repeat/Trend Analysis
Report Title: Spring 2015 Critical Reading-Thinking Assessment Reading Program		
Identify level of assessment: <input checked="" type="checkbox"/> Course/Discipline (for assessments within one course or sections of courses related within the discipline) <input checked="" type="checkbox"/> Degree/Program (for program specific or core competency assessments within courses that make up a degree)		
1a. Describe what you wanted to know about student knowledge, skills or attitudes/beliefs. (If applicable, include if this assessment is of entering students/existing students from programs of study) OR if this is a repeat assessment to "close the loop" - describe what was initially assessed and what changes were implemented. Faculty wanted to know if students' critical reading-critical thinking ability improved throughout the course of the semester.		
1b. Identify the courses that were involved in this assessment study: English 92-Critical Reading		
1c. Identify the mode of delivery for participating courses: (Check all that apply.) <input checked="" type="checkbox"/> Face-to-Face <input checked="" type="checkbox"/> Online		
1d. Identify the course objective(s), program/discipline goal(s) or core competency involved in this assessment: English 92 Course Objectives: By the end of the semester, the student will demonstrate c. the ability to apply the critical reading strategy of analysis by breaking broad topics down into their component parts and explaining the relationship of the parts to each other and to the whole. d. the ability to apply the critical reading strategy of synthesis to understand the connections between seemingly disparate details and make inferences and draw conclusions. e. the ability to apply the critical reading strategy of evaluation to make judgments about an author's presentation and message. Program Goals: The student shall be able to: Analyze, synthesize, and evaluate to critically read materials. Institutional Core Competency of Critical Thinking		

2a. Describe how the assessment was conducted/completed:

Students were given a standardized pre-test at the beginning of the semester and then were given the same test as a post-test at the end of the semester.

2b. What tool was used to collect performance measures?

A standardized critical reading test

2c. What was the sample size of the group assessed & the number of possible students?

For Spring 2015, all students enrolled at the time of the pre-test were given it. This was a total of 207 students. For Spring 2015, all students enrolled at the time of the post-test were given it. This was a total of 205 students.

For Fall 2014, 303 students took the pre-test while 299 students took the post-test.

3a. What were the results of this assessment? (Organize data in a chart – no interpretation needed here.) If this is a repeat assessment, also share the previous assessment results:**Eng 92 Critical Reading Pre-Assessment Item Analysis- Spring 2015**

3b. What was the cut-off point (benchmark) indicating satisfactory student performance for the goal/objective assessed?

Two benchmarks: one was that 70% of the students should increase their scores from pre-test to post-test, and that students should have a post-test mean of 10.5 (70%).

4a. What is the faculty analysis/interpretation of these results/trend results?

70% of the students did not increase their post-tests scores; only 61.4% did so. This connects to Fall 2014 when only 44.8% increased. Although a greater percentage increased during the Spring Semester 2015 than did in Fall Semester 2014, neither group made the benchmark of 70%. The same held true for the mean scores of both semesters: a mean score of 8.76 during the spring as compared to a mean score of 8.01 in the fall. In the spring, 28.2% of students scores actually decreased from the pre-test to the post-test, while 38.8% of student scores decreased from the pre-test to the post-test in the fall. Reading faculty find it hard to believe that student ability levels dropped so drastically during the course of the semester and so assume that additional factors, such as motivation, engagement, and lack of positive academic success skills, also played a part. Faculty will work to find reading materials that students find motivating. Faculty also recommend that students take an academic success course, such as ED 101, and utilize the Success Center.

4b. Did the groups meet the benchmark?

No, neither group did although the Spring 2015 semester students came closer than the Fall 2014 students did.

4c. Were there differences in performance based on ethnicity, mode of delivery, GPA, participation in specific support activities, etc.?

In both semesters, gender did not seem to play a major role with both genders producing a raw score in the 8s for a post-test score. White students did have a higher mean (9.6) on the post-test than did African-American students whose mean was 8.1. This compares to 8.8 mean for white students and a 7.8 mean for African-American students in Fall 2014. In both semesters, the number of students (N) was about the same. As far as age, the highest scoring mean in Spring 2015 for both pre- and post-test (9.0 and 10.3) was in the 26-29 age range although the N was only 6 students. The biggest increase in mean scores, 7.3 and 10.1, was in the 38+ age group although the N was only 11. Other groups were in the 7s and 8s.

For Fall 2014, there was less difference in the pre- and post-test scores across all age groups, with everyone scoring into the 7s and 8s.

5. What changes, if any, do the faculty plan on implementing to improve student performance? [Note: The response to this question is printed in a public document, the OA Report, posted on www.swic.edu without the above information. Please write this response for summary stand-alone statement that the public will understand – what was assessed, analysis of results, and plans for action.]

English 92-Critical Reading students were given a standardized pre- and post-test with critical reading questions in order to assess their critical reading-thinking skills. Students did not show the amount of progress that faculty expected, especially comparing student in-class performance to post-test critical reading scores, wherein 28.2% actually had scores that decreased between the pre-test and post-test. Faculty did not witness an almost 30% drop in performance in their classes and so assume that post-test scores were the result of other factors, such as motivation, engagement, and lack of successful college skills and strategies.. Faculty will work to find reading materials that engage students. Faculty recommend that students enroll in a college academic success course, such as ED 101, in addition to utilizing the Success Center.
