**Report Title:**  
Spring 2014 Vocabulary Assessment Reading Program

**Identify level of assessment:**

- ☒ Course/Discipline (for assessments within one course or sections of courses related within the discipline)
- ☒ Degree/Program (for program specific or core competency assessments within courses that make up a degree)

**1a. Describe what you wanted to know about student knowledge, skills or attitudes/beliefs. (If applicable, include if this assessment is of entering students/existing students from programs of study) OR if this is a repeat assessment to "close the loop" - describe what was initially assessed and what changes were implemented.**

Reading faculty wanted to know if students' vocabulary knowledge increased by the end of the semester.

**1b. Identify the courses that were involved in this assessment study:**

English 91-Reading Comprehension

English 92-Critical Reading

**1c. Identify the mode of delivery for participating courses: (Check all that apply.)**

☒ Face-to-Face

**1d. Identify the course objective(s), program/discipline goal(s) or core competency involved in this assessment:**

Program Goal:

Students will expand their vocabulary.

English 91 Course Objective:

Students will improve comprehension by building vocabulary.

English 92 Course Objective:

By the end of the semester, successful students will demonstrate the ability to enrich their language usage by enlarging their vocabulary, understanding implied meanings/messages and literary concepts such as metaphors/similes and irony.

**2a. Describe how the assessment was conducted/completed:**

Students were given a pre and post vocabulary test.

**2b. What tool was used to collect performance measures?**

Standardized vocabulary pre and post tests provided by Townsend Press, the publishing company of the vocabulary texts used in these reading courses.

**2c. What was the sample size of the group assessed & the number of possible students?**

For English 91: pre test 114, post test 114--all of the students enrolled on the date of the tests.

For English 92: pre test 216, post test 216-all of the students enrolled on the date of the tests.

**3a. What were the results of this assessment? (Organize data in a chart – no interpretation needed here.) If this is a repeat assessment, also share the previous assessment results:**

Course	Semester	Pre (Mean)	Post (Mean)
English 91	2013	36.6	63.2
English 91	2014	35.6	66.5
English 92	2013	36.9	70.4
English 92	2014	37.7	70.7

The following data is not available for 2013.

Students results between Pre and Post test scores for Spring 2014:

Course	Percentage of students whose scores increased	Percentage of students whose scores stayed the same	Percentage of students whose scores decreased
English 91	91%	3%	6%
English 92	96%	.5%	3%

**3b. What was the cut-off point (benchmark) indicating satisfactory student performance for the goal/objective assessed?**

Faculty wanted to see improvement between pre and post scores and wanted the post test mean to be 70%, as this is the minimum passing score for both courses.

**4a. What is the faculty analysis/interpretation of these results/trend results?**

Both English 91 and English 92 benefitted from direct vocabulary instruction.

**4b. Did the groups meet the benchmark?**

Both courses met the benchmark of improvement between pre and post test scores. This trend held true for both Fall 2013 and Spring 2014. Data for Spring 2014 showed that 91% of English 91 students improved between the pre and post test, and that 96% of English 92 students improved between the pre and post tests

English 91 did not meet the benchmark of a 70% mean, scoring a mean of 66.5%, up from a mean of 63.2% in Fall 2013. English 92 did meet the benchmark of a 70% mean, scoring a mean of 70.7%, up from a mean of 70.4% in Fall 2013.

**4c. Were there differences in performance based on ethnicity, mode of delivery, GPA, participation in specific support activities, etc.?**

These were not assessed.

**5. What changes, if any, do the faculty plan on implementing to improve student performance?** *[Note: The response to this question is printed in a public document, the OA Report, posted on [www.swic.edu](http://www.swic.edu) without the above information. Please write this response for summary stand-alone statement that the public will understand – what was assessed, analysis of results, and plans for action.]*

Both English 91-Reading Comprehension and English 92-Critical Reading students were assessed on their vocabulary growth from the beginning to the end of the semester. Both groups of students did increase in vocabulary growth. English 91 students increased from an average of 35.6% on the pre test to 66.5% on the post test. 91% of English 91 students improved their scores from the pre test to the post test. English 92 students increased from an average of 37.7% on the pre test to 70.7% on the post test. 96% of English 92 students improved their scores from the pre test to the post test.

Reading faculty also wanted both groups to have an average score of 70% on the post tests as this is the minimum passing score for the courses. English 91 did not meet this benchmark with an average post test score of 66.5%, up from an average of 63.2% in Fall 2013. English 92 students did meet this benchmark with an average of 70.7% on the post test, up from an average of 70.4% in Fall 2014.

English 91 faculty will increase the amount of class time spent studying vocabulary. Reading faculty also recommend that students utilize the Success Center for out-of-class vocabulary review.
